A/Few Words From This Year’s Winners…

A/P Lee Yuan Kun  
Dept of Microbiology, ATEA winner

“How would you describe your approach to teaching and educating students?”

It is human nature to love story-telling and have a good laugh. That is how we have learnt through the ages and that is how I believe we can approach teaching. When we weave facts and theories into a coherent story and sprinkle in a bit of humor, they arouse our students’ curiosity and they are motivated to acquire a greater thirst for knowledge, making learning an enjoyable and gratifying process for them.
