“Responsibility and approachability has characterized him as one of the best lecturers you can ever meet in NUS. Despite there being no shortcut to studying, he tries his best to create something similar to a shortcut so as to make the contents as accessible to the students as possible. Despite his tight course schedule, he still manages to squeeze in several minutes to encourage us to study hard not only for his module but also for our other modules. He clearly knows his mission as a lecturer in NUS—impacting knowledge wholeheartedly!”

“He has patience in imparting the module’s concepts to students and engaging them during each lecture and tutorial. He is very well prepared before classes with structured learning outcomes. With a cheerful attitude, he engages students and makes learning a joy as much as he enjoys teaching.”
